**GENERAL RELEASE**

## **DataOne Software produces vehicle tonnage reference**

**BEVERLY, Massachusetts, December 20, 2010** – DataOne Software, a division of Dominion Dealer Solutions, and a leading provider of automotive content and media announced the production of a vehicle tonnage reference data set which will allow warranty and service contract companies to class vehicles by badge and tonnage class. This data set is most useful for systems that use the badging of the vehicle as an indicator for vehicle tonnage for risk analysis.

DataOne's full automotive data and rich media solutions are utilized across the automotive industry for dealership marketing solutions ranging from inventory management and Web site design to CRM and service center solutions to key portals and classified listing sites.

### **About DataOne Software**

Since 1999, DataOne Software has fulfilled unique content and data needs in the automotive marketplace providing businesses with cost-effective data integration and support for rapid technology development. The company sources automotive and related content including data and media, and was one of the first companies to make automotive content available by web service. Today, DataOne Software, as a division of Dominion Dealer Solutions, provides data and materials to most segments of the automotive industry including insurance, warranty and service contract sectors, transportation, federal and state agencies, newspaper and print, as well as the auto dealer marketing sector.
